WHAT YOU NEED

- Activity Card
- Something to color with
- Scissors

STEP 1

Color both sides of the card, making sure you can still see the marks where you will need to fold/cut.
**STEP 2**

Fold the card in half along the solid line in the middle. Make sure the dashed lines are still visible.

**STEP 3**

With the card still folded in half, cut on the dashed lines. Make sure you do not cut past the dash marks as some lines do not go all the way to the edge of the card.
STEP 4

Unfold your card.

STEP 5

Fold the two outside bars down and out of the way.
STEP 6  Without cutting the two outside bars, cut down the center line.

STEP 7  Carefully stretch out your bracelet and wear your Science fashion! Show us your final product with #HMNSoutreach
Bring this activity to life in your classroom!
Print this sheet on cardstock and just follow the directions!
