2026-2027 School Year Lab Guide

Programming at HMNS Hermann Park and HMNS Sugar Land

Contact us at:

reservations@hmns.org

Program Pricing

WEEKDAY LABS

Lab Times: 9:30 am, 11:00 am and 1:00 pm at Hermann Park

11:00am and 1:00 pm at Sugar Land (Thursdays and Fridays)

Capacity: 25 students per lab

Pricing: \$250 per Weekday Lab; \$300 per Dissection Lab

HMNS at Hermann Park: Available on select dates each month

HMNS at Sugar Land: Available on select Thursdays and Fridays each month

Homeschool Groups will receive a link to register for the school year via the Reservations team. If you are a new Homeschool group interested in booking a selection of weekday labs for the entire school-year, please email Reservations at reservations@hmns.org.

LAB ON DEMAND

Lab Times: Subject to availability and group's schedule

Capacity: 25 students per lab

Pricing: \$300 per lab on demand; \$300 per Dissection Lab

2-hour Lab: \$600

Travel Fee: \$80 for traveling presentations

Book a Lab on Demand: www.hmns.org/booklab

Need more information?

For Hermann Park Labs, visit us at hmns.org/labs.

For Sugar Land Labs, visit hmns.org/hmns-at-sugar-land/classes.

Lab Programming

Each lab lasts one hour, unless otherwise noted, and includes admission to the Museum’s permanent exhibit halls for lab participants and one chaperone per participant.

WEEKDAY LABS

Students examine ancient objects, investigate technology, meet live animals, or conduct scientific experiments depending on the nature of the lab booking. Three new Weekday Lab topics are available monthly.

PAGES 6-8

LABS ON DEMAND

Want to add a lab experience to your Field Trip? Add a TEKS-aligned Lab on Demand to your reservation. Each of these hands-on labs is tailored to your group's needs. Advanced Lab topics are available for High School students.

PAGES 10-17

Weekday Labs

Our Weekday Labs are appropriate for **1st - 8th grade students**. *Dissections are limited to 5th grade and up.* These labs are available in person at Hermann Park and Sugar Land.

Weekday Lab & Lab on Demand Themes

- PAGE **10** **Earth Science Labs** explore everything on Earth — from the depths of the sea to our place in space.
Supported by Woodside Energy
- PAGE **12** **Time Labs** brings history to life — explore various topics with interactive activities.
- PAGE **13** **TechnoScience Labs** feature interactive experiments in various chemistry and physics topics.
- PAGE **14** **Biology Labs** cover a wide range of topics in molecular biology, ecology, genetics, and more.
- PAGE **15** **Wildlife Labs** use specimens to discuss the natural world and the unique creatures who inhabit it.
- PAGE **17** **Dissection Labs** take an inside look at a variety of specimens, from organs to animals. Note: Some dissections are only offered at HMNS Hermann Park.

Weekday Lab Topics at HMNS Hermann Park and Sugar Land

Our Weekday Labs are appropriate for 1st - 8th grade students. Dissections are limited to 5th grade and up.

SEPTEMBER

Techno-Science Lab – *Optical Illusions*: Investigate ambiguous pictures, impossible shapes, strobe effects and other amazing illusions.

Wildlife Lab – *Magnificent Madagascar*: This island sits off the coast of Africa and is known as a biodiversity hotspot. Learn more about the strange inhabitants of this land that is roughly the size of Texas.

Dissection Lab – *Movers and Shakers*: How do you move? In this class you learn about muscle and bone structure and function. Find out what your muscles are made of! (Includes chicken foot dissection)

OCTOBER

Earth Science Lab – *Tornado Alley*: Join us in this whirlwind of a class to find out more about tornadoes, how they form, and where we can find them in the United States!

Time Lab – *Lost Colony of Roanoke*: Explore the mystery of the disappearance of one of the first colonial settlements in the United States. Explore the tales that developed around the disappearance and the evidence for what may have actually happened.

Dissection Lab – *Colossal Calamari*: Learn about internal and external anatomy of a common cephalopod, the squid through dissection. Learn how the squid differs from other mollusk in this inky dissection. (Includes squid dissection)

NOVEMBER

Time Lab – *Zulu Empire*: Discover this South African kingdom that gained fame during and after the Anglo-Zulu War.

Techno-Science Lab – *Balancing Act*: From levers and mobiles to leaning towers, explore the center of mass and find out why it matters.

Wildlife Lab – *Nature's Revenge*: Don't make them mad; these animals are equipped with toxins to fight back! Delve into the world of venomous and poisonous animals, particularly those that can be found in Texas.

Weekday Lab Topics at HMNS Hermann Park and Sugar Land

DECEMBER

Time Lab – *Russia: Royalty and Revolt*: Learn about the dramatic fall of the Russian Royals and the rise of Democracy in Russia.

Techno-Science Lab – *Circular Motion*: Explore rolling and spinning and discover which shapes are speediest.

Wildlife Lab – *OTTERly Great Mustelids*: Find out why ferrets make great electricians, and how wolverines have influenced pop culture as we study ferrets, wolverines and their relatives.

JANUARY

Time Lab – *Salem Witch Trials*: Delve into the history of what happened and explore scientific hypotheses of what may have driven this terrible phenomenon.

Techno-Science Lab – *Discovering Density*: Discover how hot air balloons rise, why rocks sink, and what makes submarines go up and down.

Biology Lab – *Down in the Dermis*: Take a closer look at the integumentary system in this lab as you learn about the structures of epidermis. Get an up-close view of the different features on skin that some animals have developed to survive in their natural environments

FEBRUARY

Earth Science Lab – *Making (Seismic) Waves*: Explore seismic waves and the destruction left behind by earthquakes. Learn about how scientists predict them and what causes this natural disaster.

Time Lab – *Age of Exploration*: Discover the intrepid individuals who explored the world by sea and how this period contributed to the changes and advancements of the modern world.

Wildlife Lab – *Myrmecology*: Most people are familiar with sugar ants, fire ants, crazy ants, and maybe even bullet ants, but that knowledge only scratches the surface. In fact, there are over 10,000 described ant species! Become a myrmecologist for the day and study ants that cooperate to form super colonies, set traps to capture prey and even

Weekday Lab Topics at HMNS Hermann Park and Sugar Land

MARCH

Time Lab – *Underground Railroad*: Learn about how the Underground Railroad operated and allowed enslaved people to escape to freedom.

Dissection Lab – *Fabulously Fishy*: Get hooked as you learn what makes fish so fishy. Learn about the taxonomy and ecology of the various fish species as you take a deep dive into the ins and outs of a fish (Includes perch dissection)

Wildlife Lab – *Pollution/Conservation*: Small changes in an environment can have a big impact on the wildlife within. Study the impact humans have had, both good and bad, as you learn about the effects of pollutants and how those effects were (sometimes) reversed.

APRIL

Earth Science Lab – *Recycling*: Reduce, reuse, recycle! Discover the science behind recycling, and ways that you can improve your recycling skills!

Techno-Science Lab – *Marvelous Mixtures*: Investigate properties of solutions, colloids, alloys and other mixtures.

Wildlife Lab – *Say What?*: Which creatures converse through subsonic booms? Can moths really “talk” to bats? Find out the answers to these questions and more as we explore how animals hear and communicate with sound.

MAY

Earth Science Lab – *Hurricanes*: It’s hurricane season! Learn about these powerful storms, how they form and how to prepare for them in this whirlwind class.

Techno-Science Lab – *Sound Science*: Use tuning forks and tubes to investigate pitch, resonance and the science of music.

Wildlife Lab – *Deep Sea Divers*: We know more about the surface of the moon than we do about the ocean floor. Although these deep-sea creatures are not from space, with their fangs, transparent heads, built in lights and love of toxic chemicals, they sure are aliens!

Recommended Labs on Demand

Labs on Demand are appropriate for **1st - 12th grade students**. Dissections and Biology labs are limited to 5th grade and up. Depending on availability, these labs are available in person at the date and time of your choice at Hermann Park and Sugar Land.

	Earth Science	Technoscience	Wildlife	Biology	Time	Dissection
1-2	Our Place in Space	Discovering Density	Bite Your Tongue	Flowers and Pollination	Castles	Not available for this age range.
	Fossil Sort	Falling Fast	Myrmecology		Siege Machines	
3-5	Total Eclipse of the Sun	Optical Illusions	Get A Grip	Plant Anatomy	Are You My Mummy? *	5 th Grade & Up: Intro to Dissection
	Volcanoes	Polymers	Polyp-palooza!	Cells	Roman Water	Owl Pellet Eyeball
6-8	Plate Tectonics	Sound Science	All in The Family	Mendelian Genetics	Art Through The Ages	Frog
	Behind the Tides		Signs of Intelligent Life			Heart Grasshopper
9-12	Minerals That Could Kill	Kitchen Chemistry	Magnificent Mollusca	Blood	Black Death	Brain
	Mohs Hardness Scale		Nature's Revenge	Mitosis	Is There A Dr In The Hut?	Kidney Rat

**Egypt Education at HMNS is generously supported by Apache Corporation.*

Labs on Demand

Labs on Demand are appropriate for **1st - 12th grade students**. Dissections and Biology labs are limited to 5th grade and up. Depending on availability, these labs are available in person at the date and time of your choice at Hermann Park and Sugar Land. **If you see a hand icon next to a lab, get ready for a hands-on class; dissections are all hands-on.**

Lab on Demand Topics

Earth Science Labs *Supported by Woodside Energy*

Grades 1st – 8th

Behind the Tides Find out why the tides change throughout the day, and what celestial body is to blame.

Bright Side of the Moon Explore the phases of the moon and find out what causes it to wax and wane over the course of a month.

Compost, What Is It Good For? Explore what compost is all about! Determine what every compost pile needs to turn food scraps and yard waste into nutrient-rich soil!

Crystallography and Crystal Formation From salt to snowflakes, crystals are an important part of geology. Discover the importance of crystal structure and how they are formed!

Dams! From beavers to buttresses, dams are essential to modern society. From big to small, we will explore what they do and why we have them!

Discover Maps! Learn about latitude, longitude, and cartography in this class about maps!

Fossil Fuels Dig into fossil fuels! Explore the formation of these resources.

Fossil Sort Watch your students become paleontologists! From shark teeth to seashells, students will catch a glimpse of the past. They will have the opportunity to sort through the fossil matrix and identify the fossilized remains of prehistoric ocean creatures.

Hurricanes It's hurricane season! Learn about these powerful storms, how they form and how to prepare for them in this whirlwind class.

Land Forms Explore the basic landforms and waterways found in Texas. Follow our water from spring to shore!

Layers of the Atmosphere Let's take it from the top! In this lab, we'll explore the layers of the earth's atmosphere, and discuss how altitude, pressure, and temperature change in our atmosphere.

Layers of the Earth Journey to the center of the earth? Of course! We're going to explore everything from the core to the crust and all the layers in between.

Lab on Demand Topics

Earth Science Labs *Supported by Woodside Energy*

Grades 1st – 8th

Layers of the Ocean Take a journey into the depths of the ocean! Learn about the ocean's layers and the pressure it creates for the living and nonliving things in each layer.

Minerals That Could Kill Lead, cinnabar, asbestos, OH MY! In this class, we will talk about what makes these minerals so deadly and the products that were created from them.

Mohs Hardness Scale From talc to diamonds, minerals have a known hardness. Discover the Mohs Hardness Scale and how that hardness can be harnessed!

Our Place in Space Delve into our solar system to find out what makes it unique and see what lies outside of its boundaries.

Plate Tectonics From Pangea to the present, the continents have shifted over time. Discover tectonic plates and how they shift a little bit every year!

Rock Cycle Sedimentary, metamorphic and igneous, oh my! Take a spin through the rock cycle and investigate how rocks are changed and formed.

Rocks and Minerals Is it a Mineral? Is it a Rock? Could it be both?! Discover the difference between rocks and minerals and learn how you use them daily.

Smaller than a Planet What else is in our solar system? Discover comets and asteroids, meteors and meteorites, and other bits found in space!

Total Eclipse of the Sun Explore what happens during an eclipse, and prepare for our next total solar eclipse!

Volcanoes Magma or lava? Explosive or effusive? Explore the types of volcanoes and discover some historic eruptions in this class.

Lab on Demand Topics

Time Labs

Grades K – 12th

Are You My Mummy? Discover the process of mummifying the dead; and delve into the closely held secrets of the ancient embalmers. *Egypt Education at HMNS is generously supported by Apache Corporation.*

Art Through The Ages From petroglyphs to photography - discover how humans have expressed themselves and how art shapes how we view history.

Black Death The Black Death was one of the most devastating pandemics in human history. Discover the gruesome truth about this plague and its effect on society and medicine.

Castles Explore the basics of medieval castle structure and life inside these amazing fortresses. Then use what you've learned to design your own.

Industrial Revolution Bigger, faster, stronger! Learn about the processes and technology that built the modern age.

Is There A Dr. In The Hut? Explore the good and the bad as we examine bile and blood through the lens of medicine in the ancient world. Not for those with a queasy stomach.

Race For Space Since the beginning of time Humanity has been fascinated by the stars. Learn about how we got to the moon and beyond!

Roman Water Rome was not built in a day, it's true. Lots of careful planning went into it and some amazing technological achievements came out of it. Join us as we figure out the physics and revel in the fun of moving Roman water.

Siege Machines Discover the weapons of the "Medieval Arms Race" and design a model.

CSI Labs Grades 8th – 12th

Bloodstain Pattern Analysis: Spatter Lab Bloodstains have a story to tell if you know how to listen. Get hands-on experience and learn to "listen" in our spatter lab. *Basics: 1-hour; Extended in-depth: 2-hour.*

Fingerprinting Discover the techniques crime scene investigators use to collect and examine the evidence. In addition to the classroom presentation, this hands-on class offers you the opportunity to practice lifting fingerprints and basic fingerprint identification in order to better understand the science.

Forensic Anthropology Get up close and personal with bones and discover what secrets they can tell you if you know how to listen. Class includes work with skeletal reproductions. *Basics: 1-hour; Extended in-depth: 2-hour.*

Lab on Demand Topics

TechnoScience Labs

Grades 1st – 8th

Balancing Act From levers and mobiles to leaning towers, explore the center of mass and find out why it matters.

Crash Course Investigate the physics of collisions and safety technology.

Discovering Density Discover how hot air balloons rise, why rocks sink, and explore cool density tricks.

 **Falling Fast** Explore parachutes and other ways to cushion a fall, then design and protect an egg 'passenger' from a crash.

Kitchen Chemistry Check out the cool chemistry hiding in household items.

Light Explore fluorescence, luminescence, and color as we experiment with light. Magnets Explore properties of magnets, testing different materials and investigating magnetic fields.

Marvelous Mixtures Investigate properties of solutions, colloids, alloys, and other mixtures and figure out how to separate them.

 **Optical Illusions** Investigate ambiguous pictures, impossible shapes, strobe effects, and other amazing illusions.

Optics Experiment with water drop lenses and mirrors to explore reflection, refraction, and light.

 **Polymers** From plastic and rubber to gummy bears and slime, polymers are everywhere.

Pressure Lift, crush, and hover with the amazing power of air pressure.

Shape Science Discover the science and math of shapes through tessellations, construction, and more.

Shape Science II There's so much shape science it wouldn't all fit in one class! Explore more puzzles, tessellations, and symmetry.

Skyscraper Science Experiment with tension, compression, and more to solve the problems of building sky-high.

 **Sound Science** Use tuning forks and tubes to investigate pitch, resonance, and the science of music.

Speed Explore circular motion and discover what shapes are speediest.

 **Water Works** Discover surprising things about water and explore surface tension and capillary action.

Lab on Demand Topics

TechnoScience Labs

Grades 9th – 12th

Density Discover how hot air balloons rise, why rocks sink, and explore cool density tricks.

Polymers Investigation Polymers from plastics and rubber to gelatin and glue are all around us and are incredibly useful! Explore different polymer types and properties (like strength or stickiness) and learn how they are made.

Biology Labs

Grades 1st – 12th

Blood Nobody can do without it, and we mean nobody! Learn about some different kinds of blood and use simulated blood to identify human blood types.

Carbohydrates Discover the facts about the structure and properties of a powerful energy source: carbohydrates. Crack the code and identify an unknown carbohydrate.

Cells What do you have over 75 trillion of but have never seen with the naked eye? Compare animal and plant cells as you take an up-close look at our most basic component.

Flowers and Pollination Get the buzz on how some plants pull out all the stops to attract their perfect, specific pollinator. Investigate how flower form meets function in full color.

Mitosis Learn about chromosomes and cellular division as you study mitosis.

Mendelian Genetics Investigate phenotypes, genotypes and Punnett squares using Mendel's Principles of Inheritance.

Osmosis and Diffusion Explore the mystery of molecular motion as you experiment with diffusion and osmosis.

Plant Anatomy Examine the xylem and phloem of a celery stalk, spot the structures in leaf anatomy, and ponder over photosynthesis. Carotenes, anthocyanins, xanthophylls, and tannins color our world, in this class we uncover how.

Lab on Demand Topics

Wildlife Labs

Grades 1st – 8th

All in the Family School yourself with this fun class PACKED full of information!

Amphibians Are frogs and salamander fortune tellers? Study these environmental indicators to discover what they could tell you about your own future.

Australian Wildlife It's got flying foxes, the only two egg laying mammals in the world, and more!

Bite Your Tongue Why are giraffe tongues dark? Are frog tongues really on backward? Answer these questions as we study this important and often overlooked organ.

Get a Grip Animals use everything from claws to wrinkles to hang on tight.

Get Batty! Who runs the best pest control service in Houston? It might just be our bats! Get to know your neighbors as we learn about bats.

How It's Made If you have eaten honey or worn silk, you have benefited from the labor of industrious creatures. Take a behind-the-scenes look at animal-run factories.

Just Keep Swimming Become an amateur ichthyologist in this lab all about fish fins.

Magnificent Madagascar This island sits off the coast of Africa and is a hotspot for biodiversity. Learn more about the strange inhabitants of this land.

Magnificent Mollusca What has a beak (but it's not a bird), a mantle (but it's not a fireplace), a foot (but no legs), and jet propulsion (but isn't a rocket)?

Myrmecology There are over 10,000 ant species. Become a myrmecologist and discover ants that cooperate to form super colonies, set traps to capture prey, and even grow their own food!

Nature's Revenge Don't make them mad; these animals are equipped with toxins to fight back! Delve into the world of venomous and poisonous animals, particularly those found in Texas.

One of These Things is Not Like the Other Study characteristics of living things and sort them into their taxonomic groups; then, meet the animals you sorted!

Pollution and the Food Web Small changes in an environment can have a big impact on wildlife. Discover the impact humans have had, both good and bad, as you explore the effects of pollutants in a food web.

Polyp-palooza! Often confused for plants or rocks, coral beds are full of fascinating animals working together to support an incredible amount of life forms. Pay these polyps the attention they deserve in this wildlife lab.

Signs of Intelligent Life Discover the creative methods used to study animal intelligence.

Lab on Demand Topics

Wildlife Labs

Grades 1st – 8th

Slow and Steady Turtles and tortoises seem invincible with their heavy armor, but these living tanks are quite vulnerable to human influence. Investigate why in this lab.

Texas Wildlife Learn about this beautiful state that supports everything from alligators, to songbirds, and even tarantulas.

The Better to Bite You With Say cheese! Say plants! Say meat! Smile wide and examine your teeth and the teeth of other animals to see how they match up to their favorite meal.

Young Wonders Learn about the interesting forms young animals take on their journey to adulthood.

Grades 9th – 12th

Endangered Species Come quickly because they're going fast! Why are some animal populations on the decline? What can we do to help them?

Pollution and the Food Web Small changes in an environment can have a big impact on wildlife. Discover the impact humans have had, both good and bad, as you explore the effects of pollutants in a food web.

Taxonomy Study features of living things and sort them into their taxonomic groups; then, meet some of the animals you sorted!

Lab on Demand Topics

Dissection Labs

Grades 5th – 12th

Introduction to Dissection Learn how to hold a scalpel, what tools are needed for success, and which way is up in this class for anyone unfamiliar with dissection.

Brain Put your axons to work as you model nerves and neurotransmitters.

Eyeball Blind spots, color blindness, or myopia a problem? Come find out why as you take an inside look at the eye and see how it functions.

Frog A classic example of vertebrate anatomy, the frog still has a few surprises in store.

Grasshopper Explore the world of insects as you look at the Lubber grasshopper (Romalea).

Heart Nothing beats that “Aww” moment! Take a detailed, in-depth look at one powerful muscle and vital body organ, the heart.

Kidney From filtration to waste removal, investigate the body’s very own specialized water treatment plant and body fluid balancer, the kidney.

Owl Pellet Ever wonder what happens to the indigestible parts when raptors swallow food whole? Find out as you deconstruct and explore an owl pellet.

Rat Beavers, capybara and agoutis, oh my? More fascinating than fearsome, learn about the Rodent Family from the outside in.

2-hour Advanced Dissection Labs

Recommended for older age groups who have experience in doing dissections.

Fetal Pigs An extended lab for older students. Explore mammalian anatomy of thoracic and abdominal cavities with dissection of a fetal pig in this 2-hour advanced lab.

Shark Dissection An extended lab of older students. Get up close and personal with a real shark specimen. Learn about shark ecology, anatomy, and physiology in this 2-hour advanced lab.

Snake Dissection Snakes are marvels of adaptation. They can climb, burrow, swim and move swiftly across sand...all without legs! Come see what other amazing internal body changes allow snakes to make the most of their elongated form in this 2-hour advanced lab.

**If you have questions about the animal source for the dissection materials, please email Reservations@hmns.org.*

= hands-on activity focused class
